Glen Ellyn Public Library Anywhere

Summer is not typically a time to reflect on the past, but does anyone out there remember Fall Fun Fest in October 2021, when the Foundation launched an Outreach Van Campaign to raise $80,000 for a van to serve the community beyond the library building? Shortly after Fall Fun Fest, the library received an Institute of Museum and Library Services (IMLS) American Rescue Plan Grant that provided the additional funds necessary to purchase the van! Well, if you haven’t already seen it in the library parking lot, the van has arrived!

The library looks forward to making connections in the community to provide access to library materials, programs, services, and technology at senior centers, schools, parks, and other locations. We hope that the van will also help the library build relationships to better understand the needs of its remote members and incorporate their voice within strategic planning and program development. Thank you to the Friends, the Foundation, the Rotary Club of Glen Ellyn, and IMLS for making this grand dream a reality!

The Foundation celebrated their 25th anniversary with The Silver Ball, held at The Morton Arboretum on April 28. The event also honored Dan and Midge Anderson, who have generously contributed to the library for many years. Proceeds from The Silver Ball will help fund The Workshop, a community makerspace at the library!

2023 Summer Reading begins Monday, June 5, and will embrace the Cleve Carney Museum of Art and the McAninch Arts Center at the College of DuPage exhibition of Andy Warhol with A Summer of Pop Art to benefit the Glen Ellyn Food Pantry. Readers of all ages can participate by reading or being read to every day through Friday, August 4. The library will feature Warhol pop art inspired displays, faces on the building windows, and soup cans!

We are excited to take Summer Reading ANYWHERE this summer, so when you see the van, give us a wave!

ChatGPT’s Thoughts about “Youth in Libraries”

By Christina Keasler Youth Department Director

AI has been very prevalent lately. You can’t do anything without hearing about AI writing scripts and poems or remastering a masterpiece painting. I joined ChatGPT (chat.openai.com) and asked it to “write a 300 word article about youth in libraries,” and within two minutes, I had my article. The results are below!

Libraries have long been a vital resource for young people, offering a safe and stimulating environment for learning and personal growth. In today’s digital age, libraries continue to play an important role in the development of youth by providing access to books, technology, and educational programs.

One of the most important ways that libraries support youth is through reading programs. Libraries offer a wide variety of books for young people of all ages and reading levels, including picture books, chapter books, and young adult novels. By providing access to books, libraries help young people to develop a love of reading and to improve their literacy skills. Additionally, many libraries also offer reading programs, such as summer reading programs, that encourage young people to read more and to explore new books and authors.

Another way that libraries support youth is through technology programs. Libraries have always been a place where people can access information, and in the digital age, this includes access to technology. Many libraries offer computer classes and workshops for young people to learn about coding, digital literacy, and other technology skills. Additionally, libraries often have computers, laptops, and tablets available for youth to use, which is particularly important for young people who may not have access to technology at home.

In addition to reading and technology programs, libraries also offer a wide variety of educational programs for youth. These programs may include activities such as homework help, science experiments, and art projects. These programs are designed to help young people explore new topics, develop their creativity and problem-solving skills, and learn more about the world around them.

Finally, libraries are also a safe and welcoming space for young people. It’s a place where they can explore, learn, and grow in a safe and nurturing environment. It’s a place where they can feel comfortable asking questions and seeking help.

In conclusion, libraries are essential resources for youth, providing access to books, technology, and educational programs that help young people to develop the skills and knowledge they need to succeed in life. Additionally, libraries offer a safe and welcoming space for young people to explore and grow, helping them to become responsible and engaged members of their communities.
